

**SENSIDO PRO COOLER**  
// USE INSTRUCTIONS //

// PERFUME FREE PIGMENT ADMIXTURE FOR PERFECT LIGHT SHADES. HIGHLY EFFECTIVE IN REMOVING UNDESIRABLE HAIR TONES. //

**SENSIDO PRO COOLER**

Perfume free SensiDO Pro Cooler is a versatile pigment admixture that can be used mixed in bleaching hair products, hair color, shampoo or conditioner. It effectively cancels undesired warmth and yellow undertones.

Taking in consideration hair base color even a few drops of the products can already be enough to achieve the desired end result. Either adding silver glow to achieve ever so popular Granny-style hair color, cooling down the blonde tones or adding cool undertones to dark brown shades.

// Size 250 ml //

**RECOMMENDED MIXING RATIO:**

Always before application it is necessary to analyze hair condition and darkness level. The amount of Pro Cooler needs to be chosen according to the lightest hair level.

- **With bleaching products** // Mix 1 part of Pro Cooler with 1 part of bleaching products and 2 or 3 parts of peroxide.
- **When using with hair color** // Make sure that Pro Cooler makes up max. 25% of the ready mixture and does not exceed that amount.
- **With shampoo or conditioner** // Mix 1 part of Pro Cooler with 3 or 4 parts of shampoo or conditioner.

**DARKNESS LEVELS 2-6**

1 part Pro Cooler + 1 part of Bleaching Powder or Cream + 2 or 3 parts of peroxide

**DARKNESS LEVELS 6-8**

1/3 - 1/2 part Pro Cooler + 1 part of Bleaching Powder or Cream + 2 or 3 parts of peroxide

**DARKNESS LEVELS 8-10**

Very small amount of Pro Cooler depending on hair porosity and desired end result + 1 part of Bleaching Powder or Cream + 2 or 3 parts of peroxide
